

CNN 2020 New Hampshire Primary Poll

These findings are based on the latest CNN 2020 New Hampshire Primary Poll, conducted by the University of New Hampshire Survey Center. One thousand and two hundred sixty-six (1,266) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between October 21 and October 27, 2019. The margin of sampling error for the survey is +/- 2.8 percent. Included in the sample were 461 likely 2020 Republican Primary voters (margin of sampling error +/- 4.6 percent) and 574 likely 2020 Democratic Primary voters (margin of sampling error +/- 4.1 percent). Trend points prior to July 2019 reflect results from the Granite State Poll, conducted by the University of New Hampshire Survey Center.

The random sample used in the CNN 2020 New Hampshire Primary Poll was purchased from Scientific Telephone Samples (STS), Rancho Santo Margarita, CA. STS screens each selected telephone number to eliminate non-working numbers, disconnected numbers, and business numbers to improve the efficiency of the sample, reducing the amount of time interviewers spend calling non-usable numbers. When a landline number is reached, the interviewer randomly selects a member of the household by asking to speak with the adult currently living in the household who has had the most recent birthday. This selection process ensures that every adult (18 years of age or older) in the household has an equal chance of being included in the survey.

The data have been weighted to adjust for numbers of adults and telephone lines within households. Additionally, data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.

For more information about the methodology used in the CNN 2020 New Hampshire Primary Poll, contact Dr. Andrew Smith at (603) 862-2226 or by email at andrew.smith@unh.edu.
